The Bulletin

Norwich, Wednesday, Dec. 14, 1910.

VARIOUS MATTERS

Some enormous icicles have formed during the thaw of the past two days.

Supper at Spiritual Academy Thursday—12 cents.—adv.

Santa Claus could not bring a more appreciated gift than a series of big rainstorms.

Markdown sale of trimmed hats. Mrs. G. P. Stanton.—adv.

Package laden travelers in and out of town show that the Christmas spirit is high.

Many letters and post cards from all directions come to town bearing Red Cross seals.

The Connecticut Life Underwriter association is to hold a meeting at Waterbury today (Wednesday).

Walter Garde, who has a residence at Neptune park, is planning to build a \$750,000 hotel in New Haven.

Fifty name cards for 25 cents during the holidays. At The Bulletin printing office.—adv.

"We use spring water" is a sign being conspicuously displayed in various business places about town.

During last week five petitions in bankruptcy were filed in this state, the total assets being \$7,558 and liabilities \$11,552.

Game wardens are receiving from the state supplies of buckshot to be distributed in the fields and woods for the quail.

Four new corporations, having a total authorized capital stock of \$137,000, were formed in Connecticut during the past week.

Sale by Loyal circle, King's Daughters, Buckingham Memorial, today, 2-3 p. m. Fancy work, aprons, cake and candy, ice cream, hot chocolate.—adv.

The approach of the holiday when guests will be entertained at home stimulates the demand for house furnishings and supplies.

Mortgages recorded in Norwich last week reached a total of \$5,790. During the corresponding week of 1909 the total was \$19,450.

In St. Patrick's church Tuesday morning there was a requiem high mass for Hannah Flynn, whose funeral took place Sunday afternoon.

Carpenters have been kept busy this week putting up storm doors for confiding householders who fancied that it was going to be a mild winter.

Tomorrow, December 15, is the second anniversary of the death of that distinguished Norwich man, Donald G. Mitchell, who died at his home in New Haven, aged 86.

The wedding of Miss Deborah Russell, daughter of the late Congressman Charles A. Russell, and Clinton W. Atwood of Williamsville, takes place at Dayville at noon today.

During December the planet Saturn is still a magnificent object for small telescope. It rises about sunset and can be readily found by any one, the brightest body east of the meridian.

Nearly all the alterations in connection with the Mitchell Memorial library of Westville have been completed and the committee is planning to have the library ready for use within a week.

It is expected that the location of the site for the Connecticut Woman's college will be definitely decided this week, following a town meeting in West Hartford, which is offering special inducements for that town as a location.

The United States revenue cutter school at Fort Trumbull will graduate a class of nineteen cadets on Thursday. Sixteen will become third lieutenants of the line and three will enter the engineer corps. All nineteen men will fill vacancies existing in the service.

Highway Commissioner James H. MacDonald and the Connecticut congress held in Indianapolis, Ind., on December 6 to 9, by the American Road Builders' association, returned home Saturday evening. There were 1,500 delegates at the convention.

ARGUMENTS REACHED IN

SUIT FOR FALSE ARREST

Case Will Go to the Jury Today—Suit of Ahearn vs. McBride Settled.

When the civil superior court opened here on Tuesday morning there was a conference of attorneys in the case of Ahearn vs. McBride, in which claim is made for \$1,000, and it was announced that a settlement had been reached.

Judgment of foreclosure was given by Judge Case in the suit of Aaron Gordon vs. Joseph Swartzburg, Jr., et al. The amount being \$825.25.

The next case taken up was that of Herman Fisher vs. Joseph Clumachowsky, in which \$2,000 damages are sought for false arrest. Both are from this city and the plaintiff claims that the defendant had him arrested and is responsible for his humiliation. He was charged with beating the defendant's wife and was discharged by the court January 4, 1909.

All the evidence was completed and Attorney W. H. Shields made his argument before court adjourned Tuesday afternoon. Attorneys Coughlin, Cronin and Shields will be heard today and after the judge's charge the case will go to the jury.

HIBERNIAN DIVISIONS

ELECT THEIR OFFICERS.

Those Chosen to Serve for the Ensuing Term—Several Re-elections.

At Tuesday night's meeting of Div. No. 2, A. O. H., which was held in Hibernian hall, there took place the annual election of officers for the ensuing year. Frank J. Murtha was re-elected to the presidency for the fourth time, and John E. McVeigh was honored by being returned to the office of secretary for the twentieth time.

The entire list of officers is as follows: President, F. J. Murtha, vice president, F. J. Brennan; financial secretary, John E. McVeigh; recording secretary, John E. Roddy; treasurer, P. J. Morley; chairman of standing committee, James J. Finnegan; sergeant at arms, Michael J. Bohan; sentinel, John P. Shea; chaplain, Rev. William H. Kennedy.

The following were elected as officers for Div. No. 1 at their meeting held on Sunday: President, John P. Murphy; vice president, Patrick T. Murphy, who was re-elected for the third term; recording secretary, Michael O'Connor; financial secretary, John J. Sullivan; treasurer, Patrick J. O'Connor; and John E. Roddy, Michael O'Connor, John E. Roddy, Michael O'Connor.

Williams' Vanilla Extract will improve cake, icing and filling. It is the best vanilla beans in the best way. The standard for more than sixty years and still the leader.—adv.

PERSONAL

Mrs. A. B. Jennings and daughter, Miss Dorothy Robertson, have arrived home in Tracy, Conn., from their western trip, having had a most delightful visit and journey.

Mrs. E. F. Palmer has returned to 11 Mechanic street from West Woodstock, where she was the guest of Mr. and Mrs. Charles E. Chamberlain and visited most enjoyably with a friend she had not met for twenty-eight years. The guests of Mr. and Mrs. Fred E. Ellis of Beautiful View cottage, Zion's Hill.

CAN DIVERT BOWEN BROOK FOR LESS THAN \$250.

Hiram Cook Believes This Should Be Done—Eight to Ten Men Could Do It in a Day, Sending Water Into Bog Meadow.

On Tuesday evening Civil Engineer Hiram Cook, in reply to an inquiry from The Bulletin, stated that in his opinion the city should consider the use of Bowen brook, a large brook flowing at the north end of Bog meadow, so that the water would flow into that basin instead of in its present course to the Shetucket river at a point below Baltic. This could be done at a small cost and would send a large quantity of water into the basin, particularly in the springtime. It could be done at a small cost, and without land damages, which he hardly thought there would be, it could be accomplished under \$250. It would run in at the north end of Bog meadow. While it is a big brook in the springtime, he heard a man recently say that it is now quite a brook and quite a little water is flowing through it.

Mr. Cook suggested the diverting of this brook in 1909, but it was not done, it having been pointed out to him by N. E. Gilbert. Eight or ten men could change the course of the brook in a day. There is some little distance to get the water from the brook to the Bog meadow basin, but the lay of the land is such that it can easily be done.

ONE 750-K.W. TURBINE FOR ELECTRIC STATION

Three Firms Will Be Asked to Submit Bids Upon This Machine—Changes for Boilers and Switchboards.

The board of gas and electrical commissioners have decided to install one 750-kilowatt turbine at the electric station to modernize its equipment. It was decided that this would do for several years, and at that time, if business increases in proportion to what it has in the past year or two, which is a double that size will be needed, but that is not required at present. Three firms will submit bids on the machine and when the contract is let it will contain the clause that the machine shall be installed and ready for use not later than the first of June. Because of the many orders ahead this is probably as early as it can be secured.

At the station there will be a number of changes on the switchboard, which have not been fully decided upon. No new boilers will be required, but a change must be made in the five connections. There may be other work to be decided upon later, but no decision on it has been reached as yet.

PRINCIPALS' CLUB HEARS

PAPER BY F. J. WERKING

Topic Was Manual Training and a General Discussion Followed—Prof. Crosby May Be Here Later.

There was a meeting of the Principals' club on Tuesday afternoon at the Broadway school building, at which there was a good attendance of principals. There was a fine paper read by Principal F. J. Werking of the Taftville school, on Manual Training, which told of the work in general and what he was doing in his school with it. There followed a general discussion upon the topic.

Arrangements are being made to have Professor Crosby come here for a reading this winter. He was heard here last year most favorably, and it is possible two readings will be secured with him as entertainer this winter.

GROUP MEETING OF MISSIONARY SOCIETIES

Held at First Baptist Church, With Many Present—Several Speakers.

A group meeting of the Women's Home Missionary societies of the Baptist churches of New London county took place Tuesday afternoon at the First Baptist church of this city, and was attended by representatives from the Montville, Bozrah, Lefthand and the Norwich churches. Mrs. Thomas Perkins was in charge of the meeting, and a pleasant and profitable session was enjoyed by all of those who were present.

Pleasant remarks, along missionary lines, were made by Mr. E. J. Lefthand, church, Mrs. Hattie Sargent and Mrs. Perkins of this city, and Mrs. Gyung of Groton.

Following the adjournment of the meeting refreshments were served by Mrs. A. W. Davis and Mrs. Lemuel Park, who constituted the committee in charge of the arrangements. They were assisted by Miss Beatrice Perkins and Miss Mrs. Frink.

FUNERAL OF Mrs. John H. Kelley.

On Tuesday afternoon the funeral of Mrs. John H. Kelley was held from her late home, 101 West Main street, there being many relatives and friends in attendance. The services were conducted by Rev. Herbert J. Wyckoff, pastor of the Second Congregational church. There were hand some floral forms. The remains will be taken by Henry Allen & Son to Winthrop, Conn., this morning for burial.

HUSKING FOR TRADING COVE BROOK

Fine Progress Being Made in the Trenches—Pipe Has All Been Shipped and First Consignment Should be Here Today—Pumping of Artesian Well Stopped—No Time Set for Using River Water—Hospital and Academy Get Other Supply.

There were 175 men at work for the water department on Tuesday, digging the trench and well for the Trading Cove brook water supply, and there was most satisfactory progress made on both ends. The digging of the trench was started from the brook and end, and were about 3/4 of a mile opened by the workmen, while on this end the trench through the macadam is about completed, and has progressed some distance into the lane south of the Macadam. The trench is much easier than in the street macadam, and will go along faster. Frost in the fields is not causing much trouble, and the trench is being dug to a depth of about eight feet below the surface, while the foundation for the pumping station is nearly completed. The conditions about the city remained about the same on Tuesday. Early in the morning there was a good supply to be secured, but it dropped off as the use of it increased, and during the day the same number of fixing water was being pumped through carts are working all the time, and finding more than they can attend to in supplying the demands of the people. On Tuesday in a trip through one of the men, who was at home waited all day for the cart to go by his house, but it failed to get there, as those on the street below him made so many visits to the cart on all of its trips that the supply ran out each time. At 6 o'clock he got a better half full by going to the next corner.

Today a much better showing, it is expected that the first shipment of pipe will be here today, and should be, according to a letter received by the water department on Tuesday. This letter of the 10th, stated that 120 lengths of 12 inch pipe, or three carloads, had been shipped, and they were delivered to the New Haven road at 3 o'clock on Monday, Dec. 12, so that all of it is now on the way, there being about 420 lengths in all. The pipe comes from Canada, and is of the best quality. The pipe will be started as soon as possible, and should be in full swing on Thursday.

Lake is Dropping.

By the present method of forcing the water into the pipe line from Mohegan lake is dropping about three inches a day, and it is believed that there is water enough to last for from two to three weeks. There is a small stream flowing into Fairview from Meadow brook, and from Fairview there is a small amount coming into the mains. The amount is not large, but every little helps. The pumps at Mohegan lake are being covered in.

Stopped Pumping Well.

The pumping of the first artesian well has been stopped, it being found that the quantity of water received therefrom was not sufficient, it being very small and by no means satisfactory. Both wells have, therefore, been abandoned.

Yantic River Water.

No time has been fixed for the use of the Yantic river water, and the board of water commissioners cannot say how soon it will become necessary to resort to it. Not much change has been looked for just at present, said one of the members on Tuesday, as such a step cannot be taken in a minute. If, however, satisfactory arrangements can be completed with the Falls company it is probable that water will be taken from the Yantic river there, but if that is not possible the pumping of water from a point on the Trading Cove brook, south of the bridge, will be arranged for. No definite time has been fixed for using river water, but it looks as though it would have to be used unless there is a rain storm to help out the ponds.

Railroad Not Guilty.

On Tuesday the New Haven road had the city water shut off from the stands where the engines take water, by the water department. This was because of the report that the engines had been taking water there for several days. It was found on investigation, however, that the water which was taken by the engines did not come from the city main then. The company has a large tank near the roundhouse, and that was filled with water at meter rate before the company had been requested to stop using the water. They, of course, had the right to use that water, and it was such water they took on Sunday and Monday, and did not draught from the mains.

Report of Chemist Newlands.

Dr. N. B. Lewis, health officer of the city, on Tuesday received the following report from Chemist Newlands: Middletown, Dec. 11, 1910. Dr. N. B. Lewis, Health Officer, Norwich, Conn.: Dear Sir—I have the following report regarding my visit to your city to confer with you regarding the present water famine.

As I understand the situation, the Norwich reservoir and Spaulding pond are practically empty. Your city engineer is laying a pipe to the Trading Cove brook, where an additional supply of satisfactory water will be available in about ten days. In the meantime the only available supply, which can be obtained on short notice, is the Yantic river, which receives considerable drainage contamination.

Two possible methods have been suggested for taking water from this stream.

First—That a pipe line might be laid through private property to a point a short distance south of the Norwich Town bridge and the water pumped directly into the mains without treatment.

Second—That a hypochlorite plant might be installed at the Falls mills, where the water from the brook is taken, and this will require several days. M. E. Jensen will have charge of this purifying of the water and there will be one or two assistants to examine the bacteria from time to time from samples of the water. It will require a small laboratory at the mill. The purifying will be the addition of the water of two parts of chlorine to one million parts of water, which will bleach it and kill all the germs.

When it is definitely decided where the water is to be taken from the Yantic river, better progress can be made.

For the city Mr. Jensen visited Middletown laboratory of the state and also visited Hartford, where the same process is to be adopted for the use of Connecticut river water.

The work of installing a pumping station at the Backus hospital has been completed and Yantic river water is being taken for the boiler and for flushing purposes. A trench for the line was run to the river, where an engine and pump are stationed at the river bank and were put in operation on Tuesday evening. The work has been done by Contractor Torrance and the institution will now have plenty of water for the uses this is intended for.

At the Free Academy the water ceased on Tuesday and from now on water will be brought there in barrels for flushing purposes, and spring water for drinking purposes. At the Mt. Pleasant street school the watering cart is furnishing the water for the large tank and the idea of building outhouses has been given up.

Starts on Pole Line Today. Having authority from the gas and electrical commission, Supt. W. F. Rogers will start today putting up the poles for the electric line to Trading Cove brook. It being necessary to set poles from the city line to the brook side to carry the wire. On Tuesday the placing of extra arms on poles in the city limits was under way. On the new poles there will be one cross-arm, and it will carry two pairs of No. 4 wires, which will carry 2,400 volts.

One pair of the wires now extend to the city line, while it will be necessary to extend a second pair from Pfeiffer's blacksmith shop in West Main street. For a lighting line one pair of wires would be enough, but for power it is necessary to have two pairs. At the pumping station two 10-kw. transformers will be installed. These are on hand, having been secured for another place, but can be diverted to this emergency.

The permit for the pole line in the highway has been secured and after leaving the highway at the Polsky farm it will follow the pipe line to the brook.

The following of the highway from the city line will establish a permanent pole line as far as the Polsky farm and the city limits are concerned. As the residents of East Great Plain have petitioned the commission several times for lights at that part of the town, but they never felt that it would pay to extend the line. The present emergency makes it necessary and it is probable that most all in that section, in time, will be using electricity. The Ford ice plant, it is probable, will be equipped as will also Mr. Ford's house and barn. The Agricultural society has desired light and power during fair time but was unable to get it previously, but can have all they want hereafter. The cost of the power line is uncertain, as it will depend considerably on the weather. Superintendent Rogers has promised to have the power there as soon as the station is ready to receive it.

Leaves Thursday for Tacoma.

As has been their custom for several seasons, Mr. and Mrs. Hiram Cook are to pass the winter with their son, Cook, on the Pacific slope. They will leave here Thursday for Tacoma and will not be back until Springtime.

Norwich People Attended.

Captain Shaw of the marine barracks at the naval station entertained the

officers of Fort Wright and Fort Trumbull, together with a number from Norwich and New London, from 4 to 6 Tuesday afternoon. Following the reception there were refreshments and dancing.

Incidents in Society

W. H. Carothers, Jr., of Dayton, O., is spending a two weeks' vacation at his home in town.

Mr. and Mrs. W. S. Ellis have returned to their home on Elm avenue after a brief stay in New York.

Mrs. Thomas Harland of Sentry Hill went to New York city on Tuesday to spend the remainder of the winter.

G. Wyman Carroll gave a large theater party Monday evening at the first performance of "The Lion and the Mouse."

The Harmony Whist club met Monday afternoon at the home of Mrs. D. I. Underwood of Washington street. Two tables of whist were played.
